

## REMARKS

### Amendments to the Specification

The specification is amended in the "Cross-Reference to Related Applications" section on page 1 to add the specific reference to the parent application. This amendment introduces no new matter into the specification.

The specification is also amended to clarify the identity of the six sequences, identified as SEQ ID NOS:1-6, shown in the alignment on page 97 of the specification. In order to clarify the amendment, all text underlining which was originally present in the paragraph on page 97 lines 12-18 is removed by way of the present amendment. Double brackets [[ ]] are used in this instance solely to indicate where the underlining was removed; the text within the double brackets is to remain in the specification. This amendment introduces no new matter.

### Amendments to the Claims

Claims 1-88 are pending with entry of this amendment, with claims 83 and 88 amended herein. Claim 83 is amended to correct antecedent basis from claim 82 from which it depends. Claim 88 is amended to correct a typographical error. These amendments add no new matter.

### Sequence Listing

A paper copy of the Sequence Listing from parent application USSN 09/704,469 is enclosed, along with a request to use in the instant application the computer readable form of the sequence listing submitted in the parent application.

## CONCLUSION

If a telephone conference would expedite prosecution of this application, the Examiner is invited to telephone the undersigned at (650) 298-5452.
